

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (currently amended): A system for treating articles, comprising:
 - at least one bath, in which a treatment liquid is situated, into which the articles are to be dipped;
 - a feed device, which is adapted to convey the articles are conveyed through the system and in the process are dipped ~~to dip~~ into the at least one bath;
 - a dripping zone, which is disposed in direction of motion downstream of a last bath;
 - a tilting apparatus within the dripping zone, wherein the articles may be tilted into an angular position relative to the horizontal that is suitable for dripping-off;
 - a drier disposed downstream of the dripping zone, and,the feed device comprises at least one feed carriage, which in turn comprises:
 - running gear movable along the path of motion of the articles having its own drive;
 - at least one swivel arm hingedly coupled to the running gear;
 - a holding device hingedly coupled to the swivel arm for at least one article; and,
 - mutually independently actuatable drives for the translational movement, the swivelling motion of the at least one swivel arm and of the holding device;wherein the at least one feed carriage simultaneously serves as the ~~the~~ ^{[[a]]} tilting apparatus and is movable over the dripping zone to a point in the vicinity of the drier.
2. (original): The system of claim 1, wherein the at least one feed carriage is controllable in such a way that its holding device within the dripping zone is brought into at least two positions, in which it is tilted differently relative to the horizontal.
